Item	Description	Tube Diameter	Mounting Diameter	Center Distance
------	-------------	------------------	----------------------	-----------------

- NOTES:
1. All dimensions shown are in millimeters.
 2. Center Distance is center to center between fork tubes.
 3. Arched means the center of the fork brace is curved upwards for fender clearance.
 4. Mounting Diameter is the diameter of the lower fork stanchion where the fork brace clamps.
If there are 2 numbers shown it means there is a step in the lower fork stanchion where the fork brace clamps.
You will need to slide the rubber dust up the fork tube out of the way to measure your forks.
The fork braces never clamp around the rubber dust boot.
